- 8) SGMA Activities Report
- 9) IRWM Activities Report

Thank you, and please give us a call if you have any questions or concerns regarding this information.

Notice of San Luis & Delta-Mendota Water Authority Board of Directors Regular Meeting Thursday, December 7, 2017, 9:30 a.m. SLDMWA Boardroom 842 6th Street, Los Banos

Agenda

Note: All matters listed on the Consent Calendar are considered to be routine and non-controversial and will be acted upon by a single action of the Board of Directors. There will be no separate discussion unless there is a request that a specific item be removed from the Consent Calendar during consideration of Agenda Item 3. If such a request is made, the item may be heard as an action item at this meeting.

Note Further: Any member of the public may address the Board concerning any item on the agenda before or during its consideration of that matter. For each item, public comment is limited to no more than three minutes per person. For good cause, the Chair of the Board may waive this limitation.

- 1. Pledge of Allegiance
- 2. Call to Order/Roll Call
- 3. Board to Consider Corrections or Additions to the Agenda of Items, as authorized by Government Code Section 54950 et seq.
- 4. Opportunity for Public Comment Any member of the public may address the Board concerning any matter not on the agenda, but within the Board's jurisdiction. Public comment is limited to no more than three minutes per person. For good cause, the Chair of the Board may waive this limitation.

Consent Calendar

- 5. Board of Directors to Consider Approval of Minutes from its November 9, 2017 Meeting
- 6. Board of Directors to Consider Approval of Financial & Expenditures Reports

MEMO

TO: Frances Mizuno, Assistant Executive Director

FROM: Tona Mederios, Director of Finance

- SUBJECT: December 2017 BOD Meeting Report Finance Fiscal Year - March 1, 2017 through February 28, 2018
- DATE: December 7, 2017

<u>Receivable Activity Report</u>: (Period Ending November 20, 2017). The prior receivable balance as of October 20, 2017 was \$1,517,793.35. <u>Billings</u> for the period ending November 20, 2017 were \$275,011.29

<u>Collections</u> for the period ending November 20, 2017 were \$468,045.70.

Total <u>Receivables balance</u> ending November 20, 2017 was <u>\$1,324,758.94</u>. (See Receivable Activity Report for detail

<u>Cash Activity Report</u>: (Period Ending November 20, 2017). Total Cash balance for all accounts on October 20, 2017 was \$33,504,195.49.

<u>Cash on Hand</u> account balance as of October 20, 2017 was \$0. Total increase was \$0. Total decrease was \$0. Cash balance on November 20, 2017 was <u>\$0</u>.

<u>Central Valley Community Bank - Checking</u> balance as of October 20, 2017 was (\$126,177.96). Total increase in this account was \$2,189,684.48. Total decrease in this account was \$2,596,426.45. Total balance in the Checking account as of November 20, 2017 was (\$532,919.93).

(See Cash Activity Report for detail).

<u>Central Valley Community Bank – Payroll Checking</u> balance as of October 20, 2017 was \$10.00. Total increase in this account was \$640,582.65. Total decrease in this account was \$446,265.42. Total balance in the Payroll Checking account as of November 20, 2017 was <u>\$194,327.23</u>. (See Cash Activity Report for detail).

<u>Central Valley Community Bank - Transactional Account</u> balance as of October 20, 2017 was \$3,514,150.46. Total increase in this account was \$3,428,698.84. Total decrease in this account was \$5,146,457.87. Total balance in the Transactional Account as of November 20, 2017 was **\$1,796,391.43**.

(See Cash Activity Report for detail).

<u>Central Valley Community Bank – Muni Account</u> balance as of October 20, 2017 was \$5,176,631.18. Total increase in this account was \$2,637.95. Total decrease in this account was \$2,044,317.23. Total balance in the Muni account as of November 20, 2017 was **\$3,134,951.90.** (See Cash Activity Report for detail).

<u>Cal Trust – Investment Account</u> balance as of October 20, 2017 was \$18,263,597.29. Total increase in this account was \$22,903.37. The decrease in this account was \$44,289.28. Total balance in the Investment account as of November 20, 2017 was <u>\$18,242,211.38</u>. *(See Cash Activity Report for detail).*

LAIF account balance as of October 20, 2017 was \$6,675,284.52. Total increase in this account was \$0. Total decrease in this account was \$0. Total cash balance on November 20, 2017 was **\$6,675,284.52**.

See Cash Activity Report for detail).

<u>Petty Cash</u> account balance as of October 20, 2017 was \$700.00. Total increase was \$0. Total decrease was \$0. Total Petty Cash balance on November 20, 2017 was <u>\$700.00</u>. *(See Cash Activity Report for detail).*

Total Cash balance for all accounts as of November 20, 2017 was **\$29,510,946.53**. *(See Cash Activity Report for detail).*

61

Budget to Actual Comparison: Funds 03/56: (March 1, 2017 through October 31, 2017).

Baseline measurement is 66.67% (8 months).

Note that year-to-date actual expenditures comparison to budget is an estimate only. Invoicing may not be uniform all year round. A true reflection of expenses is done at year-end after all accruals are booked and all necessary reconciliations are completed.

Member Funded Activities (March 1, 2017 through October 31, 2017). Baseline measurement is 66.67 (8 months). YTD spending is trending positive (in total) with actual spending of 44.28% of the approved budget when compared to 66.67% as budgeted. (See Budget to Actual Comparison Report for detail).

DMC Budget to Actual Comparison Summary: (March 1, 2017 through October 31, 2017).

Baseline measurement is 66.67% (8 months). YTD spending reflects a positive trend with actual spending of 60.50% of the approved budget when compared to 66.67% as budgeted.

(See Budget to Actual Comparison Report for detail).

San Luis Transmission Project

Fact Sheet

Project summary

Western Area Power Administration (WAPA) in partnership with Duke-American Transmission Company (DATC) is proposing to build and operate the San Luis Transmission project -- a new 62mile, 230-kilovolt electric transmission line that will continue to provide the electricity necessary for the economical and reliable delivery of federal water supplies to Central Valley and Bay Area residents, businesses and farms. It will run from Western's Tracy Substation in the north to the Los Banos and San Luis substations in the south.

Project benefits

- **Provide cost certainty:** Limits cost increases for water customers and provides long-term cost certainty;
- Enhance reliability: Strengthens the transmission corridor between Tracy and Los Banos areas and enhances delivery of energy and water supplies;
- **Enable renewable energy**: Strategically positions the San Joaquin Valley for expansion of renewable energy projects; expands transmission access and flexibility to help the state meet its renewable energy and greenhouse gas reduction goals
- Strengthen the transmission grid: Enhances energy transmission from Southern California to Northern California; improves transmission system reliability in the entire San Joaquin Valley and prevents catastrophic outages;
- **Existing corridor:** Relies on effective use of an existing transmission corridor to minimize costs and farm and environmental impacts.

Background and need

WAPA is a federal agency, one of four power marketing administrations within the U.S. Department of Energy, whose role is to market and deliver clean, renewable, reliable, costbased federal hydroelectric power from multi-use water projects. As a wholesale power provider, WAPA delivers power from 56 power plants operated by the Bureau of Reclamation (Reclamation), U.S. Army Corps of Engineers and other federal entities, including the Central Valley Project in California.

WAPA is required by law to provide reliable, electric transmission service to the Reclamation and its customers. WAPA's transmission contract with Pacific Gas & Electric for delivery of San Luis Unit power at the federal Central Valley Project (CVP) expired in 2016, and Reclamation requested that WAPA develop the San Luis Transmission Project to replace the expiring contract.

About the project

WAPA is the federal lead agency for the San Luis Transmission Project, developing the project for Reclamation and its San Luis Unit of the CVP. The San Luis & Delta-Mendota Water Authority (SLDMWA), which serves many of the federal water contractors, is the state lead agency for the transmission line project.

The project has completed all necessary environmental review and compliance under the National Environmental Policy Act and California Environmental Quality Act. A preferred route for the project has been determined and design of the transmission facilities is nearly complete.

Construction of the proposed transmission line is the least-cost and most reliable long-term option for local water agencies as well as California electric users generally. Specifically, the proposed transmission line will enhance delivery of low-cost Western power for use by San Joaquin Valley and Bay Area water agencies and farms. The project is expected to provide long-term power supply reliability and cost certainty for all SLDMWA and other CVP water customers. More than 45 water and leading farm groups support development of the transmission line.

Public-private partnership

The San Luis Transmission Project is benefitting from partnerships with public agencies and private organizations working to ensure the San Joaquin Valley, a region that this nation rely on to provide food for millions, continues to thrive. Together, the Department of Interior, WAPA, the SLDMWA, Reclamation and DATC. are collaborating to develop and realize this project – and do it in a cost-effective way.

Duke-American Transmission Co. is a private transmission developer working with the public stakeholders on the SLTP project. DATC is equally owned by Duke Energy, the largest utility in the nation, and American Transmission Co., a national leader in transmission development. Collectively DATC partners own and operate more than 41,000 miles of transmission lines. As a transmission-only utility, DATC provides valuable insights into meeting transmission infrastructure needs.

Public-private partnerships can provide notable advantages in infrastructure projects, and can be especially useful in critical, regionally significant projects, such as the San Luis Transmission Project. In this project, DATC would provide project execution expertise. Public stakeholders would benefit from DATC's transmission expertise while also securing a predictable, reliable transmission connection to support the water and power needs of the Central Valley.

DATC's expertise can help maximize efficiencies in the project and drive down costs. By maximizing the line capacity, others could benefit from the project, such as utilities in the area serving end users or renewable energy developers. Reclamation, WAPA, SLDMWA and DATC are working together to identify ways to design and build the line that provides for additional capacity above what WAPA requires, and do it in an efficient and cost-effective manner.

The partners are in the process of negotiating a funding agreement in principle for the project that will allow for the use of 400 megawatts of capacity by the water customers with approximately 200 MW of additional capacity available. DATC is beginning the process of marketing the additional capacity.

The participants

- <u>San Luis & Delta-Mendota Water Authority</u>: A California joint powers agency responsible for operation and maintenance of the South of Delta Central Valley Project facilities. It represents 29 federal and exchange irrigation, M&I and wetland water service contractors within the western San Joaquin Valley, San Benito and Santa Clara counties. <u>www.sldmwa.org</u>
- <u>Bureau of Reclamation</u>: A federal agency under the U.S. Department of the Interior. It is the largest wholesale water supplier in the country and the nation's second largest producer of hydroelectric power. In its Mid-Pacific Region, Reclamation owns, operates and manages the dams, power plants and canals of the Central Valley Project. <u>www.usbr.gov</u>
- <u>Western Area Power Administration:</u> A power marketing administration within the U.S. Department of Energy responsible for the delivery of federal power to federallyauthorized projects, including the Central Valley Project. WAPA authorizes construction of transmission or may act independently to build transmission in the region. <u>www.wapa.gov</u>
- <u>Duke-American Transmission Company</u>: A transmission developer equally owned by Duke Energy and American Transmission Company (ATC). Duke Energy's regulated utilities serve customers in six states in the Southeast and Midwest. ATC is the nation's first transmission-only utility. It owns and operates nearly 9,500 miles of transmission lines and 530 substations in the Midwest. <u>www.datcllc.com</u>
- <u>Water and agricultural supporters</u>: A growing number of water and leading farm groups support development of the San Luis Transmission Project:

San Luis Transmission Project A public-private partnership to help feed America

California growers help fill refrigerators and pantries across the nation. As the country's largest agricultural producer and exporter, the state produces over half of U.S.-grown fruits, nuts and vegetables. California produces more than 400 different crops, 14 of which are not grown anywhere else in the U.S. It is the nation's lead producer of nearly 80 crops, and for many commodities, such as almonds, grapes, peaches and pistachios, the state is the nation's sole producer.¹

Nine of the nation's top 10 agricultural counties are in California.² California's Central Valley, which is essentially two valleys – Sacramento Valley to the north and the San Joaquin to the south – produces the vast majority of those crops. The valley is home to thousands of farms that take advantage of the ideal growing conditions that the area provides.

The water

The agricultural operations in the San Joaquin Valley region would not be possible were it not for the irrigation systems that deliver life-sustaining water to millions of acres of farmland.

The Central Valley Project, operated by the U.S. Bureau of Reclamation, provides water to farms, homes and industry in the Central Valley as well as major urban centers in the San Francisco Bay Area and over 180,000 acres of world-class waterfowl habitat within the Pacific Flyway. One of the world's largest water storage and transport systems, the Central Valley Project, provides water for eight of the top 10 agricultural counties in California and is the largest single source of irrigation water in the state. Since it was completed in 1979, the CVP has been irrigating more than 3 million acres of farmland in the valley.

Many growers in the San Joaquin, Santa Clara valleys and San Benito County (over 1.2 million acres of prime farm land) rely on water provided by the San Luis and San Felipe units of the Central Valley Project to irrigate their fields. These farms grow more than 60 food and fiber crops and collectively produce more than \$1 billion in food and fiber annually.³

The power

The Western Area Power Administration, or WAPA, is a power marketing administration within the U.S. Department of Energy that is responsible for the delivery of federal power to the Central Valley Project. The Central Valley Project uses the power delivered by WAPA to provide water delivery services to customers.

To help control power delivery costs to water customers, WAPA is considering a proposal to build a new high-voltage electric transmission line – called the San Luis Transmission Project – to deliver power to the San Luis Unit pumping and generating station.

The U.S. Bureau of Reclamation, which owns, operates and manages the dams, power plants and canals of the Central Valley Project, together with its water customers, represented by the San Luis & Delta-Mendota Water Authority, proposed the project. The San Luis Transmission

³ San Luis & Delta-Mendota Water Authority About Us (http://www.sldmwa.org/learn-more/about-us)

Project involves constructing a new, approximately 62-mile, high-voltage electric transmission line to connect WAPA's transmission system near Tracy, Calif., to the Bureau of Reclamation's San Luis Unit pumping and generating plant near Los Banos, Calif. It would parallel existing transmission facilities through non-irrigated ranch land.

Project benefits and supporters

The primary benefit of the San Luis Transmission Project is that it would enhance delivery of low- cost WAPA power to transport federal Central Valley Project water into the San Joaquin Valley, central coast and to Bay Area water agencies and farms. Beyond that, the line would increase transfer capability between northern and southern California, increase reliability, enhance options for adding renewable generation and optimize the use of a constrained corridor. More than 45 water and leading farm groups support development of the San Luis Transmission Project.

Public-private partnership for a new connection

The San Luis Transmission Project is benefitting from partnerships with public agencies and private organizations working to ensure the San Joaquin Valley, a region that the U.S. relies on to provide food for millions, continues to thrive. Together, the Department of Interior, WAPA, the San Luis &Delta-Mendota Water Authority, Reclamation and Duke-American Transmission Co. are collaborating to develop and realize this project – and do it in a cost-effective way.

Duke-American Transmission Co. is a private transmission developer working with the public stakeholders on the SLTP project. DATC is equally owned by Duke Energy, the largest utility in the nation, and American Transmission Co., a national leader in transmission development. Collectively DATC partners own and operate more than 41,000 miles of transmission lines. As a transmission-only utility, DATC provides valuable insights into meeting transmission infrastructure needs.

Public-private partnerships can provide notable advantages in infrastructure projects, and can be especially useful in critical, regionally significant projects, such as SLTP. In this project, DATC would provide project execution expertise. Public stakeholders would benefit from DATC's transmission expertise while also securing a predictable, reliable transmission connection to support the water and power needs of the Central Valley.

DATC's expertise can help maximize efficiencies in the project and drive down costs. By maximizing the line capacity, others could benefit from the project, such as utilities in the area serving end users or renewable energy developers. Reclamation, WAPA, San Luis &Delta-Mendota Water Authority and DATC are working together to identify ways to design and build the line in a way that provides additional capacity above what WAPA requires, and do it in an efficient and cost-effective manner.

Project activity

Significant environmental and engineering progress has been made on the SLTP. The environmental review requirements under the National Environmental Policy Act and the California Environmental Quality Act have been met, and the Department of Energy published its Record of Decision on the project in April 2016. A preferred route for the project has been determined and design of the transmission facilities is nearly complete.

Stakeholders are in the process of negotiating a funding agreement in principle for the San Luis Transmission Project that will allow for the use of 400 megawatts of capacity by the water

customers with approximately 200 MW of additional capacity available. DATC is beginning the process of marketing the additional capacity.

The players

- <u>San Luis &Delta-Mendota Water Authority</u>: A California joint powers agency responsible for operation and maintenance of certain Central Valley Project facilities, including a portion of the San Luis Unit. It is made up of water agencies representing approximately 1,200,000 acres of farm land, 1,000,000 in population and over 180,000 acres of water fowl habitat in 29 federal and exchange water service contractors within the western San Joaquin Valley, San Benito and Santa Clara counties. <u>www.sldmwa.org</u>
- <u>Bureau of Reclamation</u>: A federal agency under the U.S. Department of the Interior. It is the largest wholesale water supplier in the country and the nation's second largest producer of hydroelectric power. In its Mid-Pacific Region, Reclamation owns, operates and manages the dams, power plants and canals of the Central Valley Project. <u>www.usbr.gov</u>
- Western Area Power Administration: A power marketing administration within the U.S. Department of Energy responsible for the delivery of federal power to federallyauthorized projects, including the Central Valley Project. WAPA authorizes construction of transmission or may act independently to build transmission in the region. www.wapa.gov
- Duke-American Transmission Co.: A transmission developer equally owned by Duke Energy and American Transmission Co. Duke Energy's regulated utilities serve customers in six states in the Southeast and Midwest. ATC is the nation's first transmission-only utility. It owns and operates more than 9,500 miles of transmission lines and 530 substations in the Midwest. www.datcllc.com

TO: JASON PELTIER, EXECUTIVE DIRECTOR
FROM: TOM BOARDMAN, WATER RESOURCES ENGINEER
SUBJECT: DECEMBER PROJECT OPERATIONS UPDATE
DATE: DECEMBER 1, 2017

Project Operations

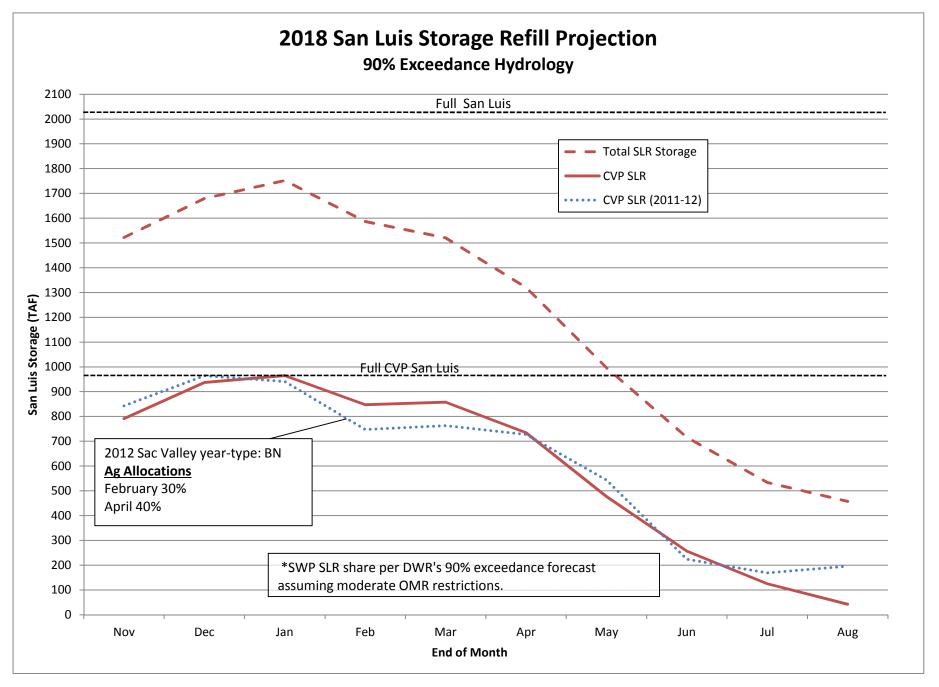

- Declining inflow to the delta during the first half of November limited Jones pumping to about 2200 cfs in efforts to comply with the fall X2 requirement per the delta smelt BiOp. However, arriving storms during the latter half of month were enough to support full pumping into December. Jones is expected to remain at capacity absent sustained dry conditions or reverse flow restrictions in Old and Middle rivers are triggered by a major storm that cause turbidity levels to spike in the delta.
- Banks was also limited to about 2,200 cfs during the first half of November, but has since increased to 6,500 cfs with the help of increased delta inflow. DWR's latest forecast shows Banks pumping at about 4500 cfs through December with possible reductions in January due BiOp restrictions.
- Millerton is currently releasing 375 cfs as required by the San Joaquin River Restoration Program. The latest estimate shows that about 70 cfs will be available for recapture in the lower San Joaquin River through December.
- San Joaquin flows at Vernalis have dropped to about 1,500 cfs; about half the rate during early November. The current flow rate is about 300 cfs less than what occurred during the last wet year in 2011.
- Shasta is 70% full at 3.21 MAF or about 138% of the 15 year average. With the reservoir at its maximum allowable level for flood control, the additional inflow resulting from over 10 inches of precipitation during November has been released.
- Folsom is 62% full at 601 TAF or about 158% of the 15 year average. The reservoir received about 4.5 inches of precipitation during November.
- CVP demands were about 122 TAF during November which is about 50% above the 15 year average.

San Luis Reservoir Storage and Allocation Outlook

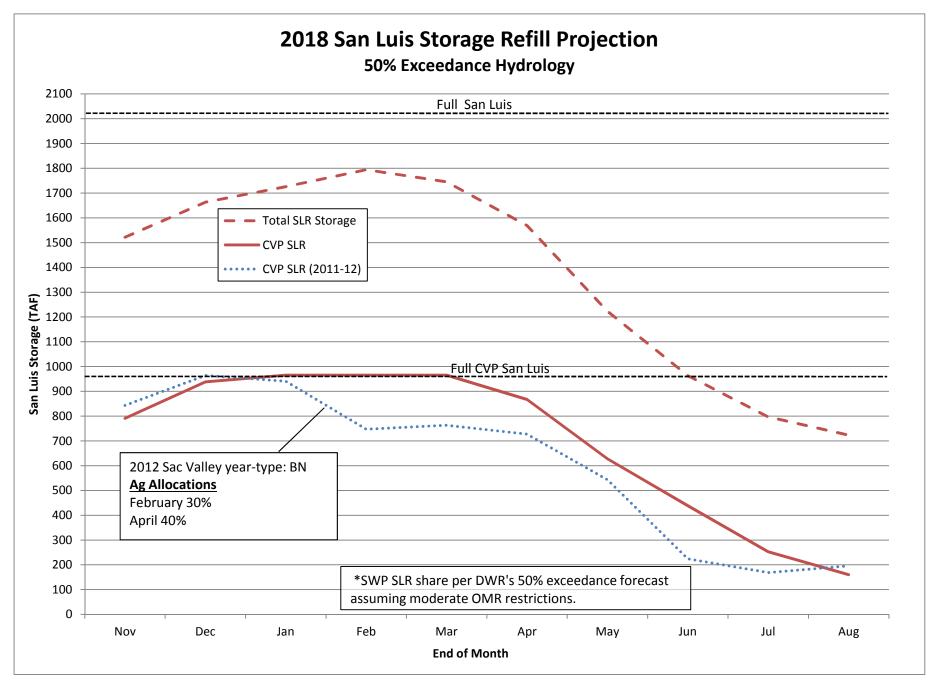

Sustained high demands during November and pumping reductions related to X2 compliance curtailed the refill of CVP San Luis to about 52 TAF for the month. As a result, the projected fill date for CVP San Luis has slipped to later in January. But, with the pre spawning movement of adult delta smelt possibly beginning in December, it is possible that

the fill projection could be further delayed or even precluded with early and sustained reverse flow restrictions in Old and Middle Rivers prompted by a sudden increase in delta turbidity levels. Absent a substantial storm that could trigger OMR- related export restrictions, the attached charts depict refill projections for CVP San Luis under dry and average conditions. Keeping the reservoir full through the winter and spring, however; will depend on hydrology and levels of export cuts imposed by various requirements of the BiOps and D1641.

With ample upstream storage and absent a severe BiOp-related export curtailment, the Ag allocation is expected to be at least 30-40% under dry conditions and 45-55% with average conditions. If the San Joaquin basin is above average during late spring, the Ag Allocation could increase to 65-70%.

To: Frances Mizuno, Assistant Executive Director

From: Paul Stearns, Operations & Maintenance Manager

Subject: O&M Report for November 2017

Operations Department

The C.W. "Bill" Jones Pumping Plant (JPP) began the month of November at three units and subsequently two units on November 8th due to the Fall X2 implementation. Pumping was reduced to one unit on the 16th for 24 hours to allow for a (fish) predator removal test at the Tracy Fish Collection Facility (TFCF). Pumping was increased to four units on the 17th and five units on the 19th where it remains to this day. The JPP averaged 3,064 cfs for the month of November.

Total pumping for the month of November at the JPP was 182,515 acre-feet. The O'Neill Pump/Generating Plant pumped 105,523 acre-feet and generated 573 acre-feet during the 24-hour one unit operation at the JPP. Due to subsidence related flow restrictions in several areas of the upper DMC, the DCI Plant has been utilized during the five unit operations at the JPP to help manage water levels in the upper DMC. 10,465 acre-feet were pumped at the DCI plant and no water was reversed into the DMC.

The Federal share in San Luis Reservoir on November 30th was 791,296 acre-feet as compared to 259,223 acre-feet on November 30th, 2016.

Releases from Friant Dam for the San Joaquin River Restoration Program (SJRRP) ranged from 375-395 cfs for the month of November. Flows into the Mendota Pool from the SJR ranged from 126-155 cfs. All the inflow was subsequently released past Sack Dam.

During the month of November, Canal Operations staff members performed open channel and closed-pipe flow measurements, bi-weekly meter readings, well soundings, meter maintenance, and rodent control.

Control Operations staff issued a clearance for the DCI Plant to investigate the plant trip on November 19th. Electrical staff found a faulty fire alarm/smoke sensor near the plant's ventilation louvers.

SCADA and C&I staff performed the following work for the month of November: Continued with DCI SCADA workstation replacement, provided support for the AVAYA phone system, continued annual maintenance on Jones Unit 3 along with the installation of the RTAC/HMI display, installed new SIM cards into the cellular routers at DMC Checks 1-12, and continued replacement of O'Neill Unit 1 alarm annunciator.

Civil Maintenance Department

The Civil Maintenance crews worked on the following projects for the month of November: Grading of DMC unpaved roadways, rodent control, chemical weed control, continued with erosion repairs on DMC and Newman Wasteway, continued to inspect wooden staircases along DMC and backfilled voids under concrete and wood stairs, repainted DMC block houses at Checks 11 & 12 (graffiti), repaired the staff gauges at DMC Checks 4 & 7, inspect and clean shoulder drains and drain inlets, installed new shoulder drain at milepost 6.36-R, hauled the O'Neill Unit 1 bowl to machine shop in Benicia, made protective repairs to the concrete liner joint at the NVRRWP discharge works, began bridge replacement on the Westley Wasteway (milepost 2.98) and maintenance and repairs to signs, fences, and gates.

An on-going subsidence area along the DMC in the Patterson area has experienced recent movement with the most affected area being between Ward and Marshall Roads. Cracking along the top of the operating road has developed and localized subsidence of the fill material/soil behind the concrete liner has allowed the high canal water level to overtop the existing buckled concrete panels. Authority staff met with Petralogix Engineering to discuss proposed geological, geophysical, and geotechnical methods of determining the root cause of the problem and potential remedies. The area is being monitored regularly for further movement until repairs and/or mitigation can be performed.

Plant Maintenance Department

The Jones and O'Neill Plant Maintenance crews worked on the following projects for the month of November: Continued annual maintenance on Jones Unit 3, removed the Tracy Water Treatment Plant booster pump #2 for motor repair, investigated DCI Plant trip, replaced the JPP center discharge tube siphon breaker pipe, traced the DMC communications cable in the Gustine area, and tested/calibrated the O'Neill Unit 1 protective relays.

O'Neill Unit 1 penstock and main unit rehabilitation: Coating contractor has removed existing liner from penstock and metal portion of the embedded suction elbow. The condition of the penstock was assessed and repairs were made by Authority staff along with the replacement of the flow meter sensor studs. The contractor will make all other repairs with epoxy material and then will begin the application of the new coating. Authority crews made weld and epoxy repairs to the embedded portion of the suction elbow and it has been recoated by the contractor. Authority crews will replace the suction elbow drain before placing the propeller housing on the suction elbow. The pump casing elbow and tapered sections have been blasted and metal repairs have been made. The contractor will perform a light blasting of the interior of the pieces before applying the new coating. The bowl section has been transported to machine shop in Benicia to have the pump bearing fit re-machined. A new bearing journal collar has been fabricated by the JPP Machine Shop and will be welded to the lower shaft section.

Engineering and Planning Department

The Engineering & Planning Department staff worked on the following projects this month: JPP unit rewind project management, Sustainable Groundwater Management Act compliance activities, lower DMC check structure stoplog and guide replacement project, OPP U-1 pump & penstock rehabilitation projects, OPP cathodic protection system evaluation, DMC MP 42 canal embankment movement inspection and evaluation, drawing and website management. Planning support was provided for civil, mechanical & electrical maintenance activities.

Engineering provided support for the JPP RTAC, watt-hour meter and annunciation upgrades, and the annunciator replacement at OPP.

Land Management Activity Summary:

Two (2) access permits were issued this month. Permit P1802023 was issued to Panoche Water District to inspect/repair the sump pump at milepost 93.25R on the Delta-Mendota Canal. Permit P1702024 issued to Del Puerto Water District to repair the DMC O&M road, was amended to extend the expiration date from November 30, 2017 to February 28th, 2018.

Completed concrete repairs at NVRRWP spillway, and testing is scheduled to occur early December. Worked with BBID on necessary improvements to the temporary turnout for Tracy Hills. The original site was not built per the approved permit, and needed additional work to protect the slope and roadway. Met onsite at NVRRWP to go over necessary road repairs contractor needs to make to return the O&M road to preconstruction conditions.

Safety Department

For the month of November, the Safety Department has worked on three accident reports, hearing conservation requirements, active shooter training, switchgear relay setting work, arc flash study work, and new employee training.

EXTRAORDINARY O&M & CAPITAL PROJECTS

DELTA-MENDOTA CANAL (DMC)

<u>Concrete Lining Repair (MP92 to MP97) Design Only (1800064)</u> Status: Initial investigations and data gathering began this month.

O&M Road Maintenance Program - Phase 7 of 10 (1800334)

Status: Project complete. The O&M road was chip sealed from MP 71.31 (Hwy 33) to MP 81.69 (Almond Drive).

DMC Flow Measurement Project - Phase 1 (1700112)

Status: One day of flow measurement/calibration was performed with the River Surveyor. Additional testing is necessary to properly calibrate the devise at all flow ranges.

Replacement of Stoplog Guides on Lower DMC Check Structures - (1800859)

Status: A site visit was performed this month to compare the check structure drawings to the as-built condition of the check structures. The drawings of the stoplog guides are being revised to reflect the variations in the concrete dimensions found during the site visit. Contract documents will be completed in December for the contractor fabrication of the stoplog guides.

C.W. "BILL" JONES PUMPING PLANT (JPP)

JPP - Arc Flash Study (1800167)

Status: No activity this month. The Arc Flash Study is scheduled to begin on December 4th. The USBR Denver Office will perform the survey and prepare the study.

JPP Excitation Cabinet & Control Panel Refurbishment (U-6) (1800333) Status: No activity this month.

O'NEILL PUMPING/GENERATING PLANT (OPP)

Design New Access Opening near Pump Bowl (1800332)

Status: Reclamation provided their design review comments this month and we preparing our responses to them.

Rehabilitate Pump Assemblies Unit No. 1 (1800196)

Status: The pump shaft is being repaired at the JPP Machine Shop. The discharge bowl has been delivered to the UNICO machine shop in Benicia for machine work on their large vertical turret lathe and scheduled to be completed on December 15th. Repairs to the propeller housing are complete and staff is currently working on repairing the discharge elbow door and applying Megasteel epoxy to the corroded inner surface areas in preparation for painting. The painting contractor, Certified Coatings, has completed the work on the embedded portion, and is currently working on the large unit pieces. They are scheduled to be completed with all pieces, except the bowl, by December 6th.

Rehabilitate Unit No. 1 Penstock Interiors (1800061)

Status: Contractor completed removing all existing liner material from penstock, and penstock condition was evaluated by visual inspection, pit gauges, and ultrasonic testing. Shallow corrosion was consistent throughout the pipe. 4 holes in penstock were found, and they have been repaired by the mechanics. All other corrosion will be repaired by the contractor using an epoxy filler material, which will begin on Dec

EXTRAORDINARY O&M & CAPITAL PROJECTS

6th. During the liner removal process, the Contractor encountered an unknown repair material and may be entitled to compensation for the additional work. We are currently waiting for contractor to provide additional proof of work.

Unit Condition Assessment (1800168)

Status: No activity this month. The OPP condition assessment data gathering is complete. USBR Denver Office will provide a report of their findings after all the test data has been analyzed.

TRACY FACILITIES (TFO)

None

C.W. "BILL" JONES PUMPING PLANT (JPP) - CAPITAL PROJECTS

JPP Unit No. 6 Rewind Project Pre-Award Activities (1800035) Consultant: Pacific Power Engineers, Inc, Rancho Cordova, CA Project Engineer: David Roose, PE

<u>Scope of Services for November 2017</u>: Met with SLDMWA on November 6th to plan final review of specifications and boiler plate. Final revision of Specifications related to "FAR", "CFR", and "WBR" requirements, final contract development, adjusted schedule to meet specification development time frame, final review comments for "Boiler Plate' before submitting specifications and boiler plate to USBR for final review. Began Project Management Plan development. Begin Heat Run set-up procedures & discussion for Unit 6. Total hours for November = 25 hours

December 7, 2017

To: Frances Mizuno, Assistant Executive Director

From: Bob Martin, Engineering & Planning Department Manager

Subject: SGMA Report for November 2017

Sustainable Groundwater Management Activity Summary:

Northern and Central Delta-Mendota Region -

SLDMWA accounting has prepared expenses to-date reports of for the Activity Agreements. Andrew Garcia developed Activity Agreement draft budgets for FY19.

The joint North and Central Committee meeting was not held in November. Andrew requested the Committee's meet in December to take action for approval of the Contract Agreement with Woodard & Curran for GSP development and Program Management. Andrew, Rebecca Akroyd, and Jon Rubin discussed the type of contract or service agreement to be developed based on the scope of work, schedule, and Activity Agreement approval process. Rebecca continued to draft the Agreement for this contract work through November, which the Water Authority will enter into with Woodard & Curran following North and Central Committee approval on December 7th.

Woodard & Curran submitted the Prop. 1 Sustainable Groundwater Planning Grant application. Leslie Dumas provided electronic copies of each of the nine attachments required to be submitted, for our records. As a reminder, the total request for Category 1 projects (Severely Disadvantaged Community specific) is approximately \$1,185,000 and for Category 2 projects, \$4,000,000. With an anticipated award of \$1,185,000 and \$1,500,000 respectively.

Andrew Garcia, Adam Scheuber with Del Puerto Water District, Chris White and Jarrett Martin with Central California Irrigation District (CCID), CCID consultant Ken Schmidt with Ken Schmidt and Associates, and Trevor Joseph and Amanda Peisch-Derby with the Department of Water Resources met on November 17th at the San Joaquin River Exchange Contractors office. CCID and their consultant presented to DWR their groundwater management approach during the past 20 years. In addition, they presented their success determining management strategies, and hydrologic characterization using an analytical method. The meeting was intended to determine whether or not the exchange contractors can utilize a non-numerical model basin characterization approach. DWR scheduled a final determination conference call for early December after this meeting concluded.

General SGMA Activities:

Andrew, Diane, and Frances met at the beginning of the month to discuss the newest Draft Coordination Agreement, which was updated by Diane to include more defined roles and responsibilities. Andrew reviewed the document to ensure the basic principles and concepts outlined by the Coordination Committee remained intact. The document was provided to the Coordination Committee for review with comments requested back by November 22nd. The Coordination Committee postponed the November meeting to December, to allow for the completion of the updated Draft Coordination Agreement document.

Andrew and the facilitator convened a Technical Subcommittee meeting on November 13th. The discussion was primarily focused on subbasin GSP updates, Proposition 1 Sustainable Groundwater Planning Grant Allocation percentage determination, a breakdown of Coordinated Plan expenses as outlined for the Coordination Agreement, and review of the "technical" sections of the draft Coordination Agreement.

December 7, 2017

To: Frances Mizuno, Assistant Executive Director

From: Bob Martin, Engineering & Planning Department Manager

Subject: IRWM Report for November 2017

Integrated Regional Water Management Activity Summary:

Disadvantaged Community Involvement Program (DACIP) -

Andrew Garcia, Jon Rubin, and Rebecca Akroyd discussed the type of contract or service agreement to be developed based on the scope of work, schedule, and funding approval process for the DACIP work. Rebecca continued to draft the Agreement for this contract work through November, which the Water Authority will enter into with Woodard & Curran as soon is the IRWM regional coordination group agrees to the proposed roles of the Water Authority and Contra Costa Water District.

Contra Costa Water District is proposing, with support from the Water Authority, to be the Grantee and enter into the Grant Agreement with DWR for the DACIP grant. Contra Costa staff will be presenting the proposed roles and responsibilities to their Finance Committee in January 2018.

Andrew followed up with the IRWM during the regularly monthly conference call in the San Joaquin Region funding area to provide notice of the revised roles of the Water Authority and Contra Costa. Due to low participation in the monthly calls, Andrew reached out individually to gauge the reaction of each participant. At this time, there is some consideration by one of 8 participants to reconsider their level of participation. The group will determine final participation in December. In addition, each participant is developing estimates for staff costs for past and future participation to incorporate into the grant application.

Andrew Garcia, with Provost & Pritchard, finalized the DACIP Communication Strategy and brochure for DAC outreach efforts. The DWR facilitator for the Sustainable Groundwater Management Act program developed a flyer to include with this brochure. These will be distributed to stakeholders and will provide a central messaging location for these programs. Ultimately, Woodard & Curran will be the point of contact and support the Water Authority with regard to this communication when the contract agreements are finalized and executed.

General Westside IRWP:

Andrew Garcia will be developing an RFP for the update of the plan in January in order to allow time for completion of work prior to the Department of Water Resources IRWM implementation grant opportunity proposal solicitation package (PSP.) DWR currently anticipates the PSP to be released in "early 2018." The IRWM implementation dollars is approximately \$27 Million, to be allocated throughout the funding area. The funding area has 9 various IRWM regions.
