Date: _____

Applicant: (Party to whom the permit, if granted, will be issued. Private landowners should contact their Water District who will submit the application on the landowner's behalf.)

Name: _____ District: _____

Address: _____ City: _____ Zip: _____

Contact Phone No. (_____) _____ Email: _____

Landowner: _____

Facility Information:

Check facility that applies: () Delta-Mendota Canal () Westley Wasteway

() Newman Wasteway () Volta Wasteway () Firebaugh Wasteway () San Luis Drain

Milepost: _____ () Left Bank () Right Bank (*when facing downstream*)

Nearest Cross Street: _____

General Description of Existing Facility to be repaired: _____

Project Information:

Description of work to be performed (Add additional sheets as necessary; include maps and drawings as needed): _____

Estimated Start Date: _____ Estimated Completion Date: _____

Will Soil Disturbance Occur: () Yes () No

(If soil disturbance occurs or is anticipated on the United States Bureau of Reclamation (USBR) right of way, a site specific biological assessment will be required. The Water Authority will need to receive a report of the findings prior to issuing the Access Permit.)

Note: This is the minimum information required for the Water Authority to issue a temporary Access Permit for work on the USBR right of way. Depending on the scope of work, and the complexity of the work, additional information may be required.

Return form to the Planning & Engineering Department by email, fax, or mail.
